this book presents the scientific outcome of a joint effort of the computer science  
departments of the universities of berne fribourg and neuchâtel within an initiative  
devoted to information and knowledge these research groups collaborated over several  
years on issues of logic probability inference and deduction the goal of this volume is to  
examine whether there is any common ground between the different approaches to the  
concept of information the structure of this book could be represented by a circular  
model with an innermost syntactical circle comprising statistical and algorithmic  
approaches a second larger circle the semantical one in which meaning enters the stage  
and finally an outermost circle the pragmatic one casting light on real life logical  
reasoning these articles are complemented by two philosophical contributions exploring  
the wide conceptual field as well as taking stock of the articles on the various formal  
theories of information

this book constitutes the refereed proceedings of the 16th international conference on foundations of software technology and theoretical computer science fst tcs 96 held in hyderabad india in december 1996 the volume presents 28 revised full papers selected from a total of 98 submissions also included are four invited contributions the papers are organized in topical sections on computational geometry process algebras program semantics algorithms rewriting and equational temporal logics complexity theory and type theory

in tax inequality and human rights experts in human rights law and in tax law debate the linkages between the two fields and highlight how each can help to tackle rapidly growing inequality in the economic social and political realms against a backdrop of systemic corporate tax avoidance widespread use of tax havens persistent pressures to embrace austerity policies and growing gaps between the rich and poor this book encourages readers to understand fiscal policy as human rights policy and thus as having profound consequences for the well being of citizens around the world prominent scholars and practitioners examine how the foundational principles of tax law and human rights law intersect and diverge discuss the cross border nature and human rights impacts of abusive practices like tax avoidance and evasion question the reluctance of states to bring transparency and accountability to tax policies and practices highlight the responsibility of private sector actors for shaping and misshaping tax laws and critically evaluate domestic tax rules through the lens of equality and nondiscrimination the contributing authors also explore how international human rights obligations should influence the framework for both domestic and international tax reforms they address what human rights law requires of state tax policies and how tax laws and loopholes affect the enjoyment of human rights by people outside a state s borders because tax and human rights both turn on the relationship between the individual and the state neo liberalism s erosion of the social contract threatens to undermine them both

quantum stochastic calculus has become an indispensable tool in modern quantum physics its effectiveness being illustrated by recent developments in quantum control which place the calculus at the heart of the theory quantum statistics is rapidly taking shape as an intrinsically quantum counterpart to classical statistics motivated by advances in quantum engineering and the need for better statistical inference tools for quantum systems this volume contains a selection of regular research articles and reviews by leading researchers in quantum control quantum statistics quantum probability and quantum information the selection offers a unified view of recent trends in quantum stochastics highlighting the common mathematical language of hilbert space operators and the deep connections between classical and quantum stochastic phenomena

the current index to statistics cis is a bibliographic index of publications in statistics probability and related fields

the presentations of the technical papers in this volume have been grouped in
